# Welcome

Dear Colleagues, dear Friends

On Behalf of the Scientific Committee, we are glad to announce the Third North-American Training Course in Stereo-ElectroEncephaloGraphy (SEEG), which will be held from September 21st to 25th, 2014.

This course will follow the four years topic-oriented cycle started in 2012 with Temporal and Temporal 'plus' epilepsies in 2012, Frontal epilepsies in 2013, Posterior cortex epilepsies this year, and Epilepsies associated with Malformations of cortical development in 2015.

As last years, participants will primarily train on real patient's data under the supervision of SEEG experts from the experienced centers of Cleveland, Grenoble, Lyon, Marseille, Milano, Montreal, Nancy and Rennes.

After reviewing digitized video-scalp-EEG, MRI, and PET data, each group will have to decide on whether to perform and how to design an optimal SEEG investigation.

They will then review and analyze SEEG findings, and eventually recommend a surgical decision. Each group conclusions will be thoroughly discussed during plenary sessions.

Plenary sessions will also include lectures about the functional anatomy of the posterior cortex, seizure semiology, and surgical issues.

We are very happy to welcome you in the amazing Sacacomie venue,

With our best regards,

Philippe KAHANE

Philippe RYVLIN
