Welcome

Dear colleagues and friends,

The epilepsy centers of Grenoble and Lyon, IDEE (Institute for Children and Adolescents with Epilepsy) and the epilepsy journal Epileptic Disorders, are delighted to welcome you to the Third international training course in Stereo-ElectroEncephaloGraphy (SEEG), held with the support of the ILAE Commission on European Affairs.

This Third SEEG course will focus on Posterior Cortex epilepsies, and follow the same successful organisation as that used for the first two courses, primarily based on computer-assisted practical training sessions where each attendees can access and analyse numerical neuroimaging and video-EEG/SEEG data. Extensive plenary discussions will cover not only epileptological aspects that are specific to posterior cortex seizures, but also the anatomy and anatomo-functional organization of the posterior cortex.

All aspects of SEEG will be covered, including selection criteria, choice of the number and targets of depth electrodes, interpretation of SEEG recordings and results of cortical stimulation, and decision-making for the most appropriate surgical excision.

We hope that this 3rd round will be as successfull as the previous ones and we look forward to welcoming you in Lyon
