Welcome

Dear colleagues and friends,

On Behalf of the Scientific Committee, we are delighted to welcome you to the Second Asian Training Course in Stereo-ElectroEncephaloGraphy (SEEG), which will be held at the Hilton Hotel in Singapore, April 19-22, 2018.

This second course will follow the same design as that of all previous Asian, North-American and European SEEG training courses, with a few didactic lectures while most time will be devoted to hands-on sessions.

These small group sessions focus on the acquisition of practical skills through case-based discussions. After reviewing digitized video-scalp-EEG, MRI, and PET data, each group will have to decide on performing and designing an optimal SEEG investigation.

In deemed implanted cases, they will then need to review and interpret the SEEG findings, and eventually recommend a surgical decision. Each group conclusions will be thoroughly discussed during plenary sessions.

Groups of participants will work on real patient's data under the permanent supervision of world leading experts in the field of SEEG.

Looking forward seeing in Singapore

Warm regards
